

reev ready Pro

REEV READY PRO LICENCE KEY FOR ONE CHARGING POINT

The reev ready Pro licence key enables the integration of a reev ready ABL charging station into the reev Dashboard Pro. The reev software licence Pro is activated for a single charging point using the licence key. The Pro licence makes it possible to operate charging infrastructure economically by offering fee-based public charging. In addition, it facilitates the management and control of charging stations, including automatic billing of charging operations as well as evaluating and monitoring available usage information. Thanks to the intuitive online operator interface, the charging infrastructure can be controlled remotely with ease. Operators can manage users via a role-based permissions concept. Drivers can also use the reev app for iOS and Android.

General information

Model	reev ready Pro licence key
Licence period	24 months from activation; can be extended for a fee, directly in the reev Dashboard
Product number	100000189
EAN number	4011721191348
Commodity code	85235110
Packaging unit (PU)	1 unit
Packaging (dimensions HxWxD)	170 x 110 x 10 mm
Items supplied	Slipcase with Pro licence key, 2 RFID charging keys

Range of functions

Controlled access approval	Access permissions for authorised drivers, e.g. via RFID card. Option of public access approval (eRoaming network and/or spontaneous ad-hoc charging)
Flexible user management	Create and manage user groups, e.g. company cars, employees, guests, parking space users
Monitoring & management	Clear display of location occupancy and charging operations in real time. All locations recorded centrally. Error messages can be resolved remotely
EV charging with consumption monitoring	Cost monitoring for company cars and fleet vehicles. Export charging histories for internal billing
EV charging for registered drivers	Charging for recurring, known drivers or hirers
Smartphone app for drivers	Enter payment and billing information. Access to transaction histories. Available for Android & iOS
Fully automated billing	Fully automated billing processes for monthly invoicing. Secure payment processing via a payment service provider
Free setting of tariffs	Allocation of different tariffs to different user groups, e.g. reduced tariffs for guests or employees. The operator chooses the charging tariffs and can always adjust them flexibly
Public EV charging applications	Ad hoc & eRoaming: Barrier-free access for guests and spontaneous charging via QR codes or charging card
Various payment options	Payment options for registered drivers (SEPA direct debit, credit card), ad hoc spontaneous charging (credit card, Apple Pay, Google Pay), eRoaming (third-party charging card) and internal billing
Personal support	Telephone & written support from the reev support team
Software updates	Automatic software updates
