

POLE Slim concrete foundation

For installing a POLE Slim mounting pole

ABL offers the POLE Slim concrete foundation for the POLE Slim mounting pole, which ensures maximum stability for the mounting pole outdoors. The design and the associated lower weight not only make installation easier, but also make it simpler to feed in and feed out the power and data lines during installation. Thanks to the square base with symmetrically embedded M12 threaded anchors, the POLE Slim mounting pole can be screwed onto the foundation in any way – misalignment is not possible. The foundation block is made from grade C35/45 concrete and complies with exposure classes XC4 and XF1. Four M12 screws and matching washers for securing a POLE Slim mounting pole are supplied.

General information

Model	Concrete foundation for installing a POLE Slim mounting pole
Product number	100000238
EAN number	4011721192338
Commodity code	68109100
Packaging unit (PU)	1 pc., pallet shipment without packaging
Items supplied	Download notice, installation kit

Product information

Fixing type	Foundation in the ground
Material	Reinforced concrete
Grade	C35/45
Exposure class	XC4 and XF1
Product dimensions (H×W×D)	600 × 260 × 260 mm
Product weight	Approx. 45.5 kg

Optional accessories

POLE Slim for a Wallbox eM4 Twin	100000192
